## Manuplas Anti-Slip Surfaces

Manuplas is a specialist custom focused contract manufacturer with a successful background in the design and production of floatation and fendering solutions for a variety of applications. Manuplas is expanding their expertise and product range to meet increasing customer demands.

Manuplas has been supplying anti-slip surfaces to the marine industry for over a decade.

### Anti-slip surface key features:

- Very high quality and grip
- Long lasting (superior to glued pads)
- Available in a variety of colours
- Easy application
- Available in 1 week of placing an order

The anti-slip comes in a 2 part solution:

1. The resin which will come in 5ltr or 25ltr tins.
2. The granules in 25kgs bags (5ltrs will cover a surface of approximately 10m<sup>2</sup>).

Application consists of painting the surface of the deck with polyurethane paint followed by even application of the granules. A further coating of paint will ensure a high quality finish.

For further information and/or a quotation for Manuplas' anti-slip surface, please do not hesitate to contact Tim Phillips on 07595 203245 or e-mail at [tim@manuplas.co.uk](mailto:tim@manuplas.co.uk)
