

FOR IMMEDIATE RELEASE

**MANUPLAS ARE A FOCAL POINT AT UK
COMPOSITES SHOW**

Manuplas' captivating displays of Mass Cast Tooling Blocks and Polyurethane Composites attracted much attention to the hundreds of exhibitors and visitors attending this annual event.

The show held at Birmingham's NEC was the UK's largest ever showcase for the composites design and manufacturing supply chain. It provided Manuplas with a unique and exciting opportunity to personally meet numerous customers and suppliers as well as generating new sales opportunities.

Manuplas are designers, engineers and manufacturers of polymer solutions specialising in the marine, offshore, renewables and composites industries. The show enabled them to promote their image and visibility within their areas of expertise which include Nett Shape Casting, CNC Machining and Polyurethane Innovation.

Manuplas launched a brand new website in time for the show along with a new product and services brochure.

For further information about Manuplas and the services they offer please visit www.manuplas.co.uk or contact sales@manuplas.co.uk
